

Dr Mohamed Salem AlAmeri

Division Director of the Genome and Biobank at the Department of Health – Abu Dhabi

Division Director of the Genome and Biobank at the Department of Health – Abu Dhabi, where he oversees the implementation of the Emirati Genome Program in the Emirate and the Abu Dhabi Biobank, leading national efforts to advance population genomics, precision medicine, and biobank infrastructure. He also serves as an Adjunct Assistant Professor at Khalifa University.

He holds a PhD in Epigenetics of Pediatric Acute Myeloid Leukemia Diagnosis, a Master’s degree with distinction in Cell and Gene Therapy from University College London, and a Bachelor’s degree with honors in Genetics from the University of Western Ontario, Canada.

Dr AlAmeri brings experience across research, education, and applied genomics. He previously served as a Teaching Fellow at University College London, contributing to postgraduate programs in Gene and Cell Therapy and Personalized Medicine and Novel Therapies, and is a member of the British Society for Genetic Medicine and Cancer Genetics, American Society of Human Genetics (ASHG) as well as International consortium of newborn genetic screening (ICoNs) . Earlier in his career, he worked as a medical laboratory technologist in molecular diagnostics at Sheikh Khalifa Medical City, building a strong foundation in clinical genomics and laboratory medicine.
